SUITABLE FOR HEIFERS, YEARLINGS AND DRY STOCK A HEIFER YEARLING RATION THAT COMPLEMENTS A FODDER AND FORAGE BASED DIET.

INGREDIENTS/BENEFITS

Crushed cereal grains

Cereal grains are a concentrated source of energy and usually the cheapest form, with much of that energy stored as starch. Which is good for yearling growth and increased daily body weight gains.

Protein meals

Protein meals also supply additional protein, which is important for further growth and gains in younger cattle and assists with setting them up for future production.

Enhanced Flavouring

Ensures palatability and continues to encourage them to eat the grain mix and keep them interested.

Lasalocid

Help prevent and control Enteric diseases.

NUTRITIONAL ANALYSIS

Minimum Crude Protein %	16%
Maximum ADF %	35%
Minimum ME	12.5 MJ/ME
Maximum Starch	54%

FEEDING DIRECTIONS

- Recommended from 12 months to transition.
