SUITABLE FROM WEANING

# A CALF RATION THAT CONSISTS OF THE HIGHEST QUALITY CRUSHED CEREALS, LEGUMES AND PROTEIN MEALS.

## INGREDIENTS/BENEFITS

### Crushed cereal grains

Reducing the particle size increases the surface area for microbial activity in the rumen and enzyme action in the small intestine.

### Legumes

Feeding legume grains to weaners can help maintain or increase weight without a significant setback following weaning.

### Protein meal

Protein such as Canola meal is a good source of concentrated energy, providing nutrients for microbial growth, and supporting animal productivity.

### Enhanced flavouring

Supplementing starter with an enhanced flavoring is advantageous to calf performance, as it entices them to eat and they're more likely to increase intake as they grow due to enjoying the taste.

### Lasalocid

An additive with antibacterial properties used to prevent and aid in the control of coccidiosis in young calves.

## NUTRITIONAL ANALYSIS

Crude Protein Min %	16%
Crude Fibre Max %	10%
Lasalocid Sodium	36mg/kg

## FEEDING DIRECTIONS

- Feed to calves from 12 weeks to 24 months of age as part of a balanced diet.
